Learning Outcomes

Upon completion of the course, students should be able to:

- give an account of key concepts and theories of organisational development and digitalisation,
- describe, explain, and critically reflect upon digitalisation from different perspectives,
- assess and critically reflect upon how digitalisation can be implemented in practice, with support from relevant theories, and
- analyse and explain how businesses can create value for customers and themselves through

digitalisation.

Content

The course is based on a view of digitalisation as a process of change and covers concepts and theories of organisational development and digital transformation. Students acquire a broad understanding of digitalisation, digitally-driven organisational development, and how change management can be conducted. The course covers different perspectives on digitalisation, discussed in terms of both research and practice. Theoretical framework and models are discussed and applied, and students practise analysing concrete cases of digitalisation. The course aims for students to develop their ability to analyse digitalisation and their understanding of how change can be implemented.

Students participate actively in lectures and exercises. The coursework requires students to do a great deal of reading, attend lectures, submit written assignments, and carry out practical exercises and presentations.
