Syllabus

Prehospital triage and management

Course Code:	KMA404
Course Title:	Prehospital triage and management <i>Triage och sjukvårdsledning inom ambulanssjukvård</i>
Credits:	6
Degree Level:	Master's level
Progressive Specialisation:	Second cycle, has second-cycle course/s as entry requirements (A1F)

Major Field of Study:

Course Approval

The syllabus was approved by the Faculty of Health, Science and Technology 2017-09-13, and is valid from the Spring semester 2018 at Karlstad University.

Prerequisites

Admission to the Nursing Specialist programme: Prehospital Emergency Care, or equivalent.

Learning Outcomes

Upon completion of the course, students should be able to:

- give an account of and apply prehospital management, priority and order triage in accidents,
- give an account of the organisation and management in severe events and disasters and identify cooperation between different care providers, police and rescue services,
- describe and reflect on what systematic quality and patient safety assurance entails,
- analyse and reflect on how improvement efforts are made in the prehospital context,
- give an account of and analyse leadership at different functional levels in prehospital nursing,
- critically review relevant questionnaires/assessment instruments for prehospital nursing research.

Content

Instruction is in the form of lectures, study assignments, seminars, and practical exercises. All instruction has an emphasis on evidence-based knowledge. The course is offered part-time and partly as distance education, partly on campus and in the training area. These components are in some cases concentrated to a number of consecutive days on campus.

Students study the management, organisation and leadership of prehospital care in disasters in relation to other care providers and public agencies. Students also practise team work and care management with a focus on the responsibilities and functions of care managers and medical experts in disasters. Leadership theories and organisation model are studied in relation to work environment, staff, and deviation reporting. Students also study quality assurance efforts related to the prehospital context and patient safety. Methods of relief and debriefing are studied in theory and practice. The module also includes reviewing and analysing relevant questionnaires/assessment instruments.

Reading List

See separate document.

Examination

Assessment is based on individual, written exams and on practical performance. The written exams cover the theoretical parts of the two themes. The individual, practical examination is carried out in connection with the practical exercises and includes management and triage in disasters.

Grades

One of the grades Distinction (VG), Pass (G), or Fail (U) is awarded in the examination of the course.

Quality Assurance

Follow-up relating to learning conditions and goal-fulfilment takes place both during and upon completion of the course in order to ensure continuous improvement. Course evaluation is partly based on student views and experiences obtained in accordance with current regulations and partly on other data and documentation. Students will be informed of the result of the evaluation and of any measures to be taken.

Course Certificate

A course certificate will be provided upon request.

Additional information

The local regulations for studies at the Bachelor and Master levels at Karlstad University stipulate the obligations and rights of students and staff.

Required course for the specialist nursing programme: prehospital emergency care.

For some course components separate certificates are issued.
