Syllabus

Degree Project

Course Code: NGGC84

Course Title: Degree Project
Examensarbete för kandidatexamen i mät- och kartteknik

Credits: 15

Degree Level: Undergraduate level

Progressive Specialisation: First cycle, has at least 60 credits in first-cycle course/s as entry requirements, contains degree proj. for B.A./B.Sc. (G2E)

Major Field of Study:

MAT (Surveying and Mapping)

Course Approval

The syllabus was approved by the Faculty of Health, Science and Technology 2021-08-31, and is valid from the Spring semester 2022 at Karlstad University.

Prerequisites

120 ECTS credits completed in the Surveying and Mapping Programme, or equivalent

Learning Outcomes

The degree project is an opportunity for the students to apply and develop the knowledge that they have acquired in an independent project.

Upon completion of the course, students should be able to:

- demonstrate enhanced knowledge of theories, methods, and applications in the main field,
- identify a scientifically interesting area and problematise it,
- demonstrate an ability to plan and carry out an independent project in accordance with sound engineering practice,

- collect and process information from different sources in the area of technology and science,
- write reports in compliance with standard academic structure and formal requirements, including correct referencing,
- take issues of sustainability and gender equality into account when planning and completing the project,
- present their results and the knowledge and arguments on which they are based orally and in writing, and
- critically review and evaluate their own project and those of others adopting a scientific approach and communicate the result in dialogue with others.

Content

Instruction is in the form of supervision and seminars. The degree project is primarily expected to be carried out in conjunction with an external client, but this is not an absolute requirement. At the beginning of the course, students submit a plan specifying the design and process of the project for approval by the examiner. The project plan must include background, aim, research questions, bibliography, proposed method, and a time plan. An introductory literature review is carried out and presented in a seminar.

Students can choose to work alone or in pairs. If two students collaborate, individual contributions must be clearly stated. The degree project is an independent assignment and each student is responsible for the process and the result. Students are also responsible for planning and requesting supervision sessions. The number of supervision sessions is limited to five and supervision is only provided for the course duration. Students who re-register at a later date are offered supervision subject to availability.

Reading List

See separate document.

Examination

Assessment is based on participation in a mandatory seminar, a project plan, a literature study, and a written project report presented in a seminar, as well as performance as a peer reviewer of another student's project.

Assessment is individual. If the examiner finds that a degree project does not reach the learning outcomes, the student may be asked to submit a revised version.

Due to limited resources, the number of assessment opportunities in this course is limited to five.

If students have a decision from Karlstad University entitling them to Targeted Study Support due to a documented disability, the examiner has the right to give such students an adapted examination or to examine them in a different manner.

Grades

One of the grades Pass with Distinction (5), Pass with Some Distinction (4), Pass (3), or Fail (U) is awarded in the examination of the course.

Quality Assurance

Follow-up relating to learning conditions and goal-fulfilment takes place both during and upon completion of the course in order to ensure continuous improvement. Course evaluation is partly based on student views and experiences obtained in accordance with current regulations and partly on other data and documentation. Students will be informed of the result of the evaluation and of any measures to be taken.

Course Certificate

A course certificate will be provided upon request.

Additional information

The local regulations for studies at the Bachelor and Master levels at Karlstad University stipulate the obligations and rights of students and staff.

Students cannot claim the right to supervision when the course has ended.
