1. identify and apply relevant statistical methods,
2. analyse multiple linear regression models,
3. analyse generalised linear models,
4. use R to analyse data material, and
5. interpret the results of the analysis.

Content

The course covers the following:

- multiple regression model

- logistics regression model
- poisson regression model
- Estimation and model fitting
- R commands

Reading List

See separate document.

Examination

Assessment is based on an individual written hand-in assignment, two written group assignments, and a written exam.

If students have a decision from Karlstad University entitling them to Targeted Study Support due to a documented disability, the examiner has the right to give such students an adapted examination or to examine them in a different manner.

Grades

One of the grades Distinction (VG), Pass (G), or Fail (U) is awarded in the examination of the course.

Quality Assurance

Follow-up relating to learning conditions and goal-fulfilment takes place both during and upon completion of the course in order to ensure continuous improvement. Course evaluation is partly based on student views and experiences obtained in accordance with current regulations and partly on other data and documentation. Students will be informed of the result of the evaluation and of any measures to be taken.

Course Certificate

A course certificate will be provided upon request.
