Results of learning

All in all, the course was valuable for me.

Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.

How likely would you be to recommend this course to a friend or colleague?

Net Promoter Score (NPS) = NaN

Promoters = 0 (NaN%)

Passives = 0 (NaN%)

Detractors = 0 (NaN%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

Comments

Course supervisor's comments

Based on the feedback from the class, the course content was deemed to be interesting, and the practical components of the course were appreciated like in previous years. The survey assessment was not filled out by the students. Some students suggested to reduce the number of in-class presentations. To improve the course, the instructors should consider updating the theoretical lectures taught in the first week of the course. More literature on campaigns and platformisation processes could be added. Furthermore, a better balance between commercial and political campaigns could be found.
