

### Final report

## HT2024\_NGAD10\_43878\_Spatial statistik i GIS

First time registered students: 29

Answer Count: 6

Answer Frequency: 20.69%

The course evaluation could be answered during the period:

18/01/2025 - 01/02/2025

When collaborative courses, several course codes are shown below:

**NGAD10 Spatial statistik i GIS, End date: 2025-01-19**

Mean value for each question. Highest value = 4.

	Mean
Supportive Structure	3.3
Varied Teaching	3.5
Discussed the Subject	3.6
Challenging	3.3
Feedback Helped	3.2
Assessment Related to Teaching	3.5
Workload	2.0
Devoted Time	3.3
Prepared in Advance	3.3
Involved in Seminars	3.2
Involved in Lectures	2.4
Increased Interest	3.6

## Results of learning

**All in all, the course was valuable for me.**

*Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.*

	Mean
All in all, the course was valuable for me	4

## How likely would you be to recommend this course to a friend or colleague?

**Net Promoter Score (NPS) = 16.7**

Promoters = 2 (33.3%)

Passives = 3 (50%)

Detractors = 1 (16.7%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

## Comments

### Course supervisor's comments

Students valued the assignments and project work, as they reinforced learning through practical application. The additional ESRI courses were also helpful for understanding statistical analyses. Since this was the first time the course was given, some shortcomings were expected. Areas for improvement include ensuring consistency in information, and providing more structured lectures. Some students requested additional exercises and a better balance between theory and practice, which will be considered for future course improvements.
