Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented

on.

The positive parts of the course are the content, the structure and the reading assignments. Also, the final project was much appreciated. However, as this needs to be done over Christmas break makes it difficult from project management point of view. The lab supervisor was involved into this course the first time.

Suggestions for changes to the next course date.

Lab supervision should be improved in terms of providing support for students. Overall load should be overseen as some students thought it has high load. However, some of the reading assignments were already optional.
