Results of learning

All in all, the course was valuable for me.

Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.

How likely would you be to recommend this course to a friend or colleague?

Net Promoter Score (NPS) = 50

Promoters = 1 (50%)

Passives = 1 (50%)

Detractors = 0 (0%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

Comments

Course supervisor's comments

Two out of two active students replied to the questionnaire and provided overall positive feedback regarding the content, the pace and the level of the course, as well as the feedback received on the written assignments. The learning outcomes were reached and the students emphasize the need for the active participation of the students in discussions and virtual meetings. Suggestions for further improvement include the addition of more virtual meetings/lectures and the updating of the course literature, which is something that the teaching team is consciously and continuously working on.
