Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented

on.

Generally, learning process and communication with teachers was good. the course was given mostly via Zoom, but SEM Labs were in campus. Still according to students' comments, more practical works and exercises are desirable.

Suggestions for changes to the next course date.

The course will be modified putting a bit more hours and attention to the SEM project work and practical issues of materials engineering.
