The Karlstad University evaluation tool is owned by the Professional Development Unit and is managed by the systems group for educational administration.

International technology project, 7.5 ECTS cr. (EMGB30)
Course convener: Maria Sandberg

Basic LADOK data

Course Code: EMGB30
Application Code: 40096
Semester: HT-22
Start Week: 202235
End Week: 202244
Pace of Study: 50%
Form of Study: Campus

Course Data

Number of questionnaires answered: 0
Number of first registrations^[1]:

Changes suggested in the course analysis of the previous course date:

--This course usually have 7-10 students with quite high activity in the seminars and in the lab. The students have not been able to choose projects. This year several projects were planed for.

Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented on.

This year only one student attended the course. That made the seminars less interesting. The student could choose project without competition. The students usually work in groups in the laboratory. This year the student had to manage self. Maybe not as fun.

The project are supposed to be presented orally to the rest of the class. This your the presentation were made together with students in EMAD21. The presentations were more interesting and also the swedish student in EMAD21 got some international experience when the presentations were held in english.

Suggestions for changes to the next course date.

Develop the presentation to be a joint event together with more Swedish students. If possible also make one seminar together with Swedish students.

1. **Number of first registrations for a course:** First registration = the first time a student registers for a specific course.
