### Changes suggested in the course analysis of the previous course date:

The course leader did not think it worked well with the process surrounding the final submission of the thesis and planned to see if any changes could be made to expedite the process. This comment was intended for the situation in June when there are about 15 students at the same time. Nonetheless, the students are now asked to obtain their serial number and get their front page approved in advance of submitting the final version to the course leader, and this seems to shorten the process.

**Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented**

**on.**

The students were very positive in their evaluation. One student suggested they be reminded two weeks before the theses are to be submitted, i.e., it is not sufficient to have this information on the course schedule.

**Suggestions for changes to the next course date.**

No changes suggested.
