Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented

on.

Only three students filled the form, yet, their feedback were positive, and in-line with other comments I have received informally from other students of the class.

Suggestions for changes to the next course date.

The course is going to be replaced by another course (DVAD26). But I will use the comments from all students in this cohort, as well as previous cohorts, to build an equally efficient course. Thanks for sharing your opinions with us.

1. **Number of first registrations for a course:** First registration = the first time a student registers for a specific course.
