Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented

on.

The course evaluation received only two respondents (out of 38 course participants) so an statistical analysis is not possible. In any case, both respondents were very positive. Quotes from the students comments:

- "I think the teachers were very professional and I also believe that they know very well about their subjects. They gave me the impression of being world leading."
- "I think this was one of the best courses I has taken."

Suggestions for changes to the next course date.

Some of the lectures should be updated or added to keep track with new developments in the field.

There was some confusion in the beginning of the course regarding the evaluation of the individual modules that was caused by changes in the course administration. A short meeting with the responsible for the modules would prevent confusions.
