The current course analysis is based on both verbal and written evaluations, which were conducted through student questionnaire and verbal communication with students during the last campus meeting. The students who have responded with the questionnaire and participated in the verbal evaluation are satisfied with the course objectives, examination process and professionalism of the teachers and other staffs with ?great? to ?very great extent?. Among the suggestions from the students for further development of the course, two specific suggestions are found interesting ? a) early information about the important occasions of the course and what is waiting in those course moments; and b) video lecture could be used as an alternative tool for distance learning. Further, the students expressed their satisfaction level by mentioning the course as motivating one in their free text comments.

Suggestions for changes to the next course date.

The suggestions from the students will be considered for the next course moment.
