Results of learning

All in all, the course was valuable for me.

Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.

Net Promoter Score (NPS) = 100

Promoters = 2 (100%)

Passives = 0 (0%)

Detractors = 0 (0%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

Comments

Course supervisor's comments

Two students answered the survey from a total of 6 first-time registered students. Responses indicate that students are satisfied overall with the course. Students comments were positive, as one student indicates "This course gives you a lot of freedom in what kind of project you pursue. The teacher does a great job guiding and mentoring you during the process, while giving excellent feedback. For me, this course fits perfectly between the prior groundwork courses and the upcoming master thesis, since you need to apply everything you learned without the big pressure of a thesis".
