## Results of learning

**All in all, the course was valuable for me.**

*Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.*

	Mean
All in all, the course was valuable for me	4

**How likely would you be to recommend this course to a friend or colleague?**

**Net Promoter Score (NPS) = 100**

Promoters = 3 (100%)

Passives = 0 (0%)

Detractors = 0 (0%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

## Comments

### Course supervisor's comments

I very much enjoy teaching this course. Due to it's topic, course participants can easily make connections to their own life experiences or future work-life expectations. That helped us to have discussions that connected the theory with actual real life situations. It was a wonderful experience being the teacher in this course and I hope we can continue teaching it also in the future.
