RESULTAT		
Kursen styrkor: The majority of students agreed 1. that the course met the aims and outcomes specified in the syllabus ((73%); 2. that assignments and activities were helpful learning opportunities (91%); 3. that lectures and instructor prepared materials were useful (73%), and 4. that the instructor gave useful feedback on assignments and exams (100%).		
Kursens svagheter: Many students (63%) did not find the textbook that relevant or helpful.		
Analys av kursvärderingens resultat: The course seems to fulfill the goals set out in the syllabus. Although several students commented on the number of required assignments, the course is an 15hp course and these assignments provided essential scaffolding so that students could succeed in their examination assignments.		
Planerade/vidtagna åtgärder: This was the first time I've taught this course and I feel it was quite successful so I'm not going to make major changes. However, I do plan to add more speaking and discussion activities.
