**should also be analysed here. Any effect of joint courses should be commented on.**

This semester we remade the course according to the digital imaging part. That unfortunately made the flow of the course a bit unclear, especially for the students. As a whole we got very positive feedback for the new form but negative feedback on the flow of information. And we admit that the changes made the course better but that it made some unforeseen problems that we need to fix to the next time. One of those things was that the project pitch was too late in the course, and therefore the project description was handed out too late that in turn made the students stressed over the group project.

**Suggestions for changes to the next course date.**

The next semester is already planned differently with the project pitch earlier in the course. That will hopefully solve most of the problems as we think that was the main reason for the misplanning of the course. We will also hand out all requirements for all assignments early in the course.
