should also be analysed here. Any effect of joint courses should be commented on.

This year we have tried to emphasize even more on the design process and this year the students were more pleased with that, and we also saw better result regarding the design process in the assignments. Some students still think the tempo is a bit high during some lectures. As we have had some computer problems during this course this might be part of the problem. There is a lot of ground to cover in this course, but fixing computer problems for 30-45 min doesn't help. NOTE! With only six answers it is hard to draw any deep conclusions.

Suggestions for changes to the next course date.

This is not in the course per se, but we need to get a good working environment to ease some stress. The course is otherwise well received and the students think they have learnt a lot.

1. **Number of first registrations for a course:** First registration = the first time a student registers for a specific course.
