### Förändringar till detta kurstillfälle

Förändringar som planerats och genomförts sedan föregående kurstillfälles kursanalys

We included two new labs. One was related to machine-readable privacy policies and another one was Privacy by Design exercise. The students had to present the results of both labs.

Furthermore, we changes the course topics, in particular we added lectures on usable access control rule sets.

### Detta kurstillfälle, uppföljning

Studenternas synpunkter och sammanfattning av resultatet från kursvärdering (enkät samt ev muntlig)

Course evaluations were done orally and via a questionnaire in itsLearning. Six students registered for the course, but only 4 participated in the end. From those four students, only two filled in the course evaluation form in itsLearning. The results from these two replies are listed below.

In the oral evaluation, the students replied that they in general like the course and the assignments. They would in general like the course teachers to organise a meeting place for the student groups working on one assignment (see also below).

### Results from the questionnaire:
