Förändringar till detta kurstillfälle

Förändringar som planerats och genomförts sedan föregående kurstillfälles kursanalys

Due to accident of the main teacher and its resulting sickness since begin of August 2014, the course needed to be given by several additional teachers. This has been reorganized in August just before the start of the course due to lack of time.

Detta kurstillfälle, uppföljning

Studenternas synpunkter och sammanfattning av resultatet från kursvärdering (enkät samt ev muntlig)

The following can be concluded from the Course Evaluation feedback, which contained 22 questions to be answered by the students in order to find out positive and negative points. Students rated the course environment 4,0 out of 5 points. Course structure was rated 3.62 out of 5 points. Instructor was rated 3,82 out of 5. Course difficulty and workload was rated 3,72 out of 5 (with 5 being very high workload and difficulty). Quality and Course recommendation was rated 3,74 out of 5. We can conclude that overall the course quality was fine and they would recommend this course to other students. The following comments have been received

by students:

Positive:

- interesting topics (even if some where very hard to understand)
- that we got back Kassler at our course. Much better in almost everything from the other instructors
- the idea with many exercises is good
- the original teachers made their part very good
- that Andreas showed up

Negative:

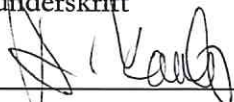

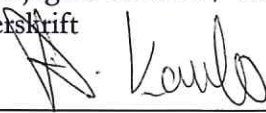

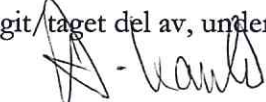

- some slides and exercises came very late
- Give the exercises before the lectures
- Literature list should be revised. Provide reading instructions. Too heavy workload with labs and exercises. Labs should be able to run from everywhere, should provide zipfile with required software
- More practice in class (not only theory)
- Better lab explanations (sometimes)
- Course literature too expensive and rarely used
- More practical examples of networking
- Write more on whiteboard
- Not that many different books

Den kursansvarige lärarens egna synpunkter och kommentarer på kursvärdering

That course literature is too expensive and rarely used can be commented by saying that most course literature is available at library. Students should use it for studying and reading up after class. That Labs should be required to run from everywhere is possible. Students just need to install software at their home Linux box if so desired. They can zip themselves.

Förslag till förändringar inför nästa kurstillfälle och förväntad effekt

We suggest to overlook the literature list and reduce the number of books on the list. We should overthink if for next instance, we can introduce biweekly exercise sessions. But that may require additional teaching hours to be allocated for this course.
