**should also be analysed here. Any effect of joint courses should be commented on.**

An additional course evaluation was performed on paper during the last meeting with the students. In that evaluation all registered students gave feedback. The evaluation has questions specifically tailored to this course to collect feedback on the different course parts, workloads, examination approaches and tools used in the course. Comments received here included appreciation for project work as an examination component, and that the combination of this course and the parallel course sometimes caused a somewhat high workload.

**Suggestions for changes to the next course date.**

Minor tweaks to scheduling of some moments.
