Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented

on.

The comments, in general, are very positive, and constructive. Besides, it is only two out of thirteen students.

The students' comments can be generalized as:

- A student wished to have the knowledge gained from this course a long time before attending this course.
- Good lectures/lecturers
- Time - it needs more reading at the beginning to adjust to the course.
- Nothing to be changed or modified in the course.

Suggestions for changes to the next course date.

The comments are positive. Yet, this course also is offered to the industrial economy (INDEK). Based on the suggestions from the students in both programs, we will work on reviewing and advancing the quality of the course.
