

Final report HT2023_MAGB65_41718_Optimering

First time registered students: 41
Answer Count: 4
Answer Frequency: 9.76%

MAGB65 Optimering, End date: 2023-10-08

Mean value for each question. Highest value = 4.

	Mean
Supportive Structure	1.2
Varied Teaching	1.5
Discussed the Subject	2.2
Challenging	3.2
Feedback Helped	1.8
Assessment Related to Teaching	1.8
Workload	2.2
Devoted Time	4.0
Prepared in Advance	3.8
Involved in Seminars	4.0
Involved in Lectures	3.8
Increased Interest	1.5

Results of learning

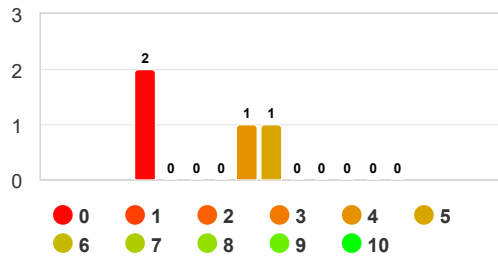

All in all, the course was valuable for me.

Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.

	Mean
All in all, the course was valuable for me	2

How likely would you be to recommend this course to a friend or colleague?

Net Promoter Score (NPS) = -100

Promoters = 0 (0%)

Passives = 0 (0%)

Detractors = 4 (100%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

Comments

Course teachers comments

Regarding the comments on the exam paper, it pointed out to students by me during the exam that Question 1 did not have a unique solution and so any of the feasible solutions would be considered as correct. I gave some hint to the students about feasibility of the solution. Many students got the message and solved Question 1 correctly, however some of the failed to understand my comments.

The next academic year I am planning to choose more of the homework questions from the suggested textbook.
