PUBLISHED COURSE ANALYSIS

Publishing date: 2022-08-15

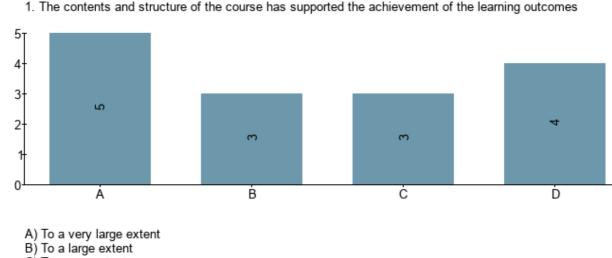

A course analysis has been carried out and published by the course convener.

The Karlstad University evaluation tool is owned by the Professional Development Unit and is managed by the systems group for educational administration.

Software Testing Foundations, 7.5 ECTS cr. (DVGB17) Course convener: Bestoun S. Ahmed Al-Beywanee

Basic LADOK data		Course Data	
Course Code:	DVGB17	Number of questionnaires answered:	15
Application Code: 39714		Number of first registrations ^[1] :	111
Semester:	VT-22	5	
Start Week:	202203		
End Week:	202222		
Pace of Study:	25%		
Form of Study:	Distans		

Changes suggested in the course analysis of the previous course date:

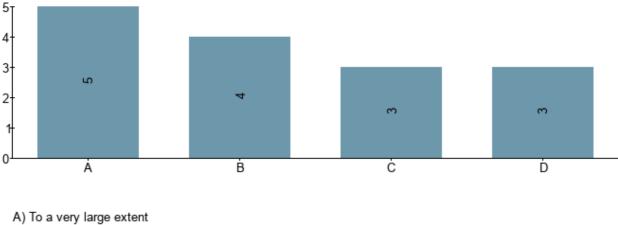

1. The contents and structure of the course has supported the achievement of the learning outcomes

C) To some extent

D) To a little extent or not at all

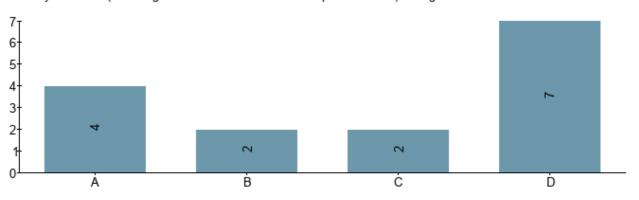

2. The assessments included in the course have given me the opportunity to demonstrate my achievement of the learning outcomes

B) To a large extent

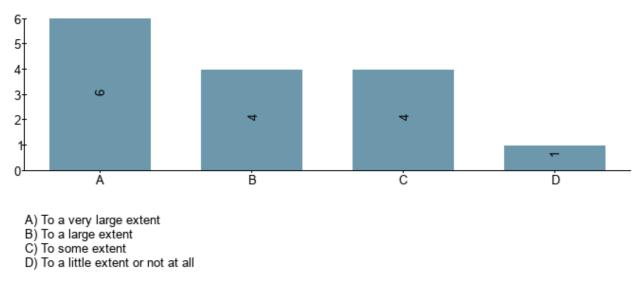

C) To some extent

D) To a little extent or not at all

3. My workload (including scheduled activities and independent work) during the course has been

A) 40 hours per week or more (or 20 per week or more for courses given as half-time studies, 10 hours or more for course B) Between 30 and 39 hours per week (or between 15 and 19 hours for courses given as half-time studies, or between 8 C) Between 20 and 29 hours per week (or between 10 and 14 hours for courses given as half-time studies, or between 5 D) Less than 20 hours per week (or less than 10 hours per week for courses given as half-time studies, or less than 5 h

4. During the course, I have experienced the reception from teachers and other staff as professional

Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented

on.

The course is 7.5 course over 6 months. So, that workload should be equivalent. Currently, the course has less workload than 7.5.

85 students enrolled in the course and around 65 finished in the end. We got a lot of positive feedback from the students, and this year we got almost double the number of students. Overall, we are happy with the course, but we will take some of those comments into consideration.

Suggestions for changes to the next course date.

The course structure could be better. and aligning the labs with the content, and the structure may lead to a better feeling for the students. The explanation of the labs could be improved.

1. **Number of first registrations for a course:** First registration = the first time a student registers for a specific course.
