Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented

on.

Only 25% of the participants responded to this questionnaire, but an oral evaluation was also conducted and the students appreciated the content of the course, the teachers and the assignments. The students seem to like the format of delivery method, and think things functioned well.

Suggestions for changes to the next course date.

One suggestion was to have a more clear requirement description for the individual assignment, and this will take into consideration in the future course. Students also seem to like the diversity of the course delivery method, more field experts will be invited in the future.
