Increased Interest	0.0

Results of learning

All in all, the course was valuable for me.

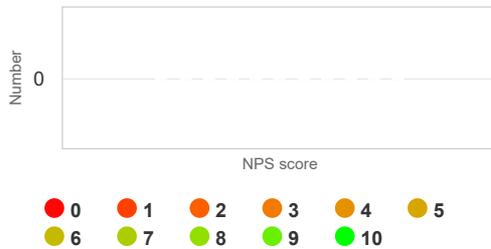

Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.

	Mean
All in all, the course was valuable for me	0

- I agree
 - I somewhat agree
 - I somewhat disagree

How likely would you be to recommend this course to a friend or colleague?

Net Promoter Score (NPS) = NaN

Promoters = 0 (NaN%)

Passives = 0 (NaN%)

Detractors = 0 (NaN%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

Comments

Course supervisor's comments

An in-class evaluation with the students (including one exchange student) gave:

Things to keep in the course

- Keep the canvas week structure and interviews
- The guest lectures were really nice and fun. I like the group activities and discussions in class. The seminar and the Business plan is also really fun to do, I really like that.
- Dynamic and interactive lessons
- Keep live interviews/lessons with other experts

Things to change in the course

- Change, length of course (shorter)
- Dive into building new studio instead of looking at big studios
- Some examples/help in money calculations in Excel
- I think sometimes the description on canvas can be a bit confusing.
