**Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented**

**on.**

According to students suggestions, some parts might be digitally presented to save time for the students. This might be somehow complex because the course is offered to students with different background but it could be a case to explore as digital teaching in some parts. In general, the course worked well, only the transformers part might sound a bit difficult.

**Suggestions for changes to the next course date.**

Revise transformers part and try to implement digital teaching if possible.
