Final report

HT2025_ISAE06_47991_Forskningsprojekt inom Informatik

First time registered students: 4

Answer Count: 1

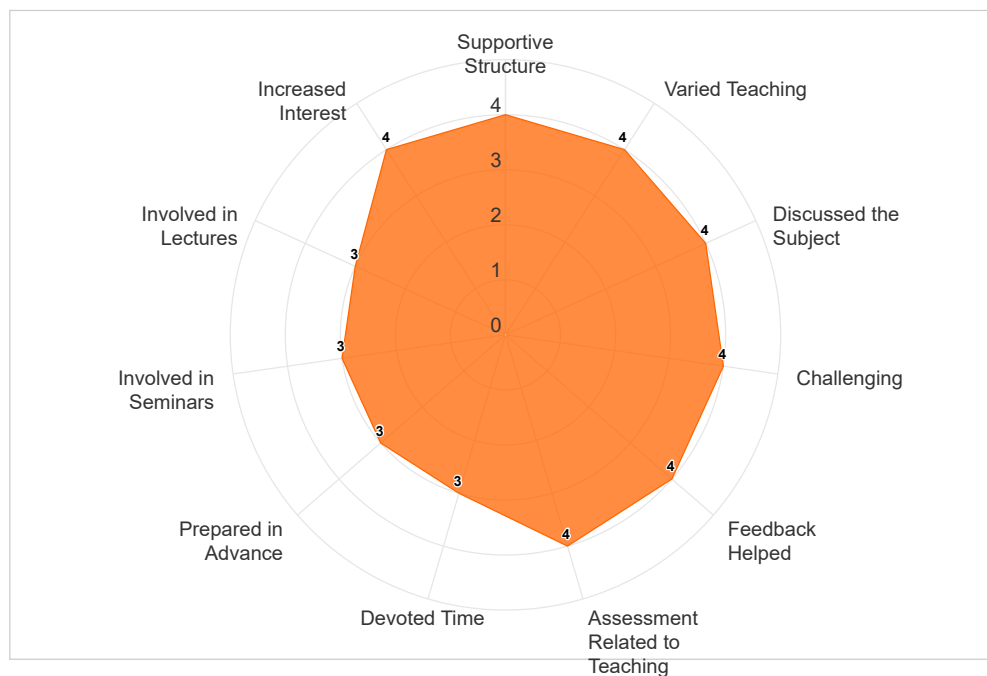

Answer Frequency: 25.00%

The course evaluation could be answered during the period:

17/01/2026 - 31/01/2026

When collaborative courses, several course codes are shown below:

ISAE06 Forskningsprojekt inom Informatik, End date: 2026-01-18

Mean value for each question. Highest value = 4.

	Mean
Supportive Structure	4.0
Varied Teaching	4.0
Discussed the Subject	4.0
Challenging	4.0
Feedback Helped	4.0
Assessment Related to Teaching	4.0
Workload	3.0
Devoted Time	3.0
Prepared in Advance	3.0
Involved in Seminars	3.0
Involved in Lectures	3.0
Increased Interest	4.0

Results of learning

All in all, the course was valuable for me.

Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.

	Mean
All in all, the course was valuable for me	4

How likely would you be to recommend this course to a friend or colleague?

Net Promoter Score (NPS) = 100

Promoters = 1 (100%)

Passives = 0 (0%)

Detractors = 0 (0%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

Comments

Course supervisor's comments

The master students are sometimes busy with other courses or salaried work. The pace of progression during the course has varied and no one completed on time, but everyone is happy about pursuing their own projects. One student has worked in collaboration with a couple of students from a nearby vocational training centre in order to have a better graphical design of the minimal prototype developed and which will be important if the student continues with this project for the master's thesis.
