**should also be analysed here. Any effect of joint courses should be commented on.**

The course went precisely as it was designed and I am pleased with the students evaluation. No special modifications of the course are needed for the next time.

One novelty happened this year: An Erasmus lecturer (Liviu Marcoci, Technical University of Bucharest, Romania) has taught one of the lectures. I think it is good to expose the students from time to time also to different people with teaching styles.

**Suggestions for changes to the next course date.**

More attention is needed and additional efforts need to be paid to attract a higher number of students to attend this course. This year I had only mathematics students. The course could be followed also by physics students holding a proper level of basic mathematics.
