- D) Deficient

**should also be analysed here. Any effect of joint courses should be commented on.**

As was noted by many respondents the schedule was bad this year. For some reason the booking of the lab rooms was not handled as it should have, which caused a lot of problems. The responsible teacher (me) is the one to blame of course, so I assume responsibility and will try to do it better next year.

The exams is another point for critique, but according to rules and regulations the examination should be individual and according to "rule of law". For a course that is primarily done through group work, there is a need for individual assignments and exams serve that purpose. Fun, they might not be, however.

**Suggestions for changes to the next course date.**

The structure is the main point of critique, with the poor schedule as the most visible sign of the (lack of) structure. We will work on making the course much more structured for next time.
