**Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented**

**on.**

Only one suggestion: "In each assignment, we got research papers with different kinds of research methodologies used in it. It would be better if we can have a prior understanding of the paper before starting the review." This could be accommodated in the course if the start-up meeting is 2h instead of only 45 minutes.

In general, the course structure is appreciated: "According to my opinion, all the course components (seminars, research articles, review sessions, own paper selection, feedbacks, and presentations) went well and I think all these can keep within the course." & "I thought guest lecturers sessions are very helpful to gain more knowledge about the subject. Therefore, I think it is so useful to every student."

**Suggestions for changes to the next course date.**

If hours are allowed to increase for this course, more introductions can be given, esp. in the beginning.
