Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented

on.

The choice of the topic of the master thesis is a critical aspect in the success of the final project. For a guaranteed success, the student must commit to the tasks and get fully involved. The supervisor will support with the needed mathematical (etc.) knowledge and further useful advices regarding writing preparation of the defence, etc..

Suggestions for changes to the next course date.

This year the community of defending students is much increased - 8 persons. Hopefully, they will interact together at least what concerns writing, checking codes, practical aspects of the life in Karlstad, etc.
