Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented

on.

To be able to do more hands-on exercises in the class, it is really needed that the students read (and understand) a good part of the theory and of the solved exercises by themselves.

Suggestions for changes to the next course date.

The number of solved exercises in the class will increase slightly as well as the amount of readings the student has to do outside the class.
