Results of learning

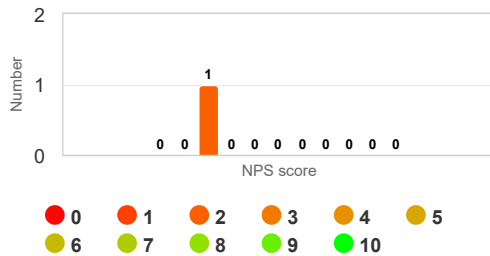

All in all, the course was valuable for me.

Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.

How likely would you be to recommend this course to a friend or colleague?

Net Promoter Score (NPS) = -100

Promoters = 0 (0%)

Passives = 0 (0%)

Detractors = 1 (100%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

Comments

Course supervisor's comments

The course offered a broad and varied overview of the relationships between digital media and their content on the one side and media audiences/users on the other. While those who attended the lectures participated well, overall attendance could have been higher. The literature seminar was well attended and the final workshop/seminar provided space for student presentations which was one of the special moments of the course. The exam showed a "bell curve" distribution of grades. Finally, if more students gave a feedback it would help to assess the course thoroughly.
