**Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented**

**on.**

Students are involved in a research project. They take independent studies in terms of reading up literature and doing a prestudy. The tasks assigned are doable within the timeframe. The project is interesting and relevant. Overall, students were very happy and thought this is one of the most interesting courses they had. However, some students felt a bit lost at the begin.

**Suggestions for changes to the next course date.**

At the begin of the course, more frequent meetings should be held to get students a better start.
