

Final report

HT2024_DVAE20_45461_Avancerade trådlösa nätverk och system

First time registered students: 5

Answer Count: 3

Answer Frequency: 60.00%

The course evaluation could be answered during the period:

09/11/2024 - 23/11/2024

When collaborative courses, several course codes are shown below:

DVAE20 Avancerade trådlösa nätverk och system, End date: 2024-11-10

Mean value for each question. Highest value = 4.

	Mean
Supportive Structure	4.0
Varied Teaching	3.7
Discussed the Subject	3.3
Challenging	3.7
Feedback Helped	3.7
Assessment Related to Teaching	3.3
Workload	2.0
Devoted Time	3.3
Prepared in Advance	2.7
Involved in Seminars	3.0
Involved in Lectures	3.0
Increased Interest	3.7

Results of learning

All in all, the course was valuable for me.

Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.

	Mean
All in all, the course was valuable for me	4

How likely would you be to recommend this course to a friend or colleague?

Net Promoter Score (NPS) = 66.7

Promoters = 2 (66.7%)

Passives = 1 (33.3%)

Detractors = 0 (0%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

Comments

Course supervisor's comments

The students have a clear positive feedback for the course. They find the overall structure supportive and liked the varied teaching and received feedback, among others.

The course results a bit challenging, but this is quite natural considering that it focuses on wireless communication and systems, which is a broad subject with some quite challenging theoretical and practical topics. Some students suggest to further improve the assignment (which was already changed from last year, from simulations to real data analysis). This is definitely a good suggestion and we will continue to improve this part of the course for the next round.
