1. Resultat

Kursens styrkor

Accessible to most students (novices of Political Science and who do not have English as first language), language used by lecturers were not too advanced

Gives students an introduction to Swedish life

Interactive and good discussions

Kursens svagheter/utvecklingsförslag

Some students found it difficult with having different lecturers

Some students expressed that it was too few lectures/times met in throughout the course

Some students thought the course was too 'easy'

Övrigt

2. Analys av uppföljningens resultat

We have been successful in keeping a good balance (topic/language) in the course, however we do understand that the students may be disappointed with the numbers of lectures (however this is out of our control unless more funding is allocated which would mean more contact hours with the students) and that the course is also too 'basic' for students whom have studied political science elsewhere.

3. Planerade/vidtagna åtgärder

Provide further breakdown of topics of lectures/seminars in course schedule in order to make this more visible to students.

4. Utbildningsrådets synpunkter
