

PUBLISHED COURSE ANALYSIS

Publishing date: 2022-11-09

A course analysis has been carried out and published by the course convener.

The Karlstad University evaluation tool is owned by the Professional Development Unit and is managed by the systems group for educational administration.

Mathematics for Engineers III, 7.5 ECTS cr. (MAGA47)

Course convener: Grigor Nika

Basic LADOK data

Course Code: MAGA47

Application Code: 39549

Semester: HT-22

Start Week: 202235

End Week: 202244

Pace of Study: 50%

Form of Study: Campus

Course Data

Number of questionnaires answered: 3

Number of first registrations^[1]: 12

Changes suggested in the course analysis of the previous course date:

--I don't have per se any changes that I would like to suggest for the course. I simply would like to point out that the material we cover mixes two very different fields together and this can be hard for the student. Also, we might have to address the depth of each topic we address, particularly in the probability and statistics course.

Analysis based on course evaluation, including comments fields. If information has been collected in other ways, it should also be analysed here. Any effect of joint courses should be commented on.

The pace of the course seems to be the main concern of the students, especially, when it comes to probability and statistics. The recommended text is insufficient in addressing the aforementioned module, but this is to be expected, since the two modules the course covers are quite different and no single textbook could sufficiently cover both topics.

Suggestions for changes to the next course date.

From what I understood reading the students' feedback, we might have to address the topics in the course, the textbook of the course, and the depth of each topic at some point.

1. **Number of first registrations for a course:** First registration = the first time a student registers for a specific course.
