Results of learning

All in all, the course was valuable for me.

Courses that were considered valuable were related to personal development, acquisition of new knowledge and skills, understanding of something. Higher ratings can refer to students' perceived development (learned a lot, and it was useful). Lower ratings can refer to scanty development of knowledge and skills or not understanding certain themes or their parts, not understanding the necessity and significance of the course, problems in the learning environment.

How likely would you be to recommend this course to a friend or colleague?

Net Promoter Score (NPS) = 57.1

Promoters = 5 (71.4%)

Passives = 1 (14.3%)

Detractors = 1 (14.3%)

The Net Promoter Score (NPS) is a metric that measures student experience and predicts the effectiveness of a course. It calculates an NPS score based on a key question using a 0-10 scale, asking how likely students would recommend the course to others. Respondents are grouped into Promoters, Passives, or Detractors based on their score, and the NPS is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The NPS is a core metric for course evaluation programs and is trusted by educational institutions to engage their students and improve their learning experience performance.

Comments

Course supervisor's comments

It is crucially important that the students select their topic for the course (i.e. the direction of the master thesis as well as the potential supervisor) asap. Once the choice is made, commitment and efforts need to be invested and then results will come. The more the student performs in this course, the better will be the resulting master thesis at the end of the year. So, this is a far-reaching course and requires a sustained effort if one wants good results.
