

Faculty of Health, Science and Technology
Geo-Science

Course Reading

Project course in remote sensing and digital image processing

Valid from 08/15/2019

Course Code: NGGC01

Course Title: Project course in remote sensing and digital image processing

Credits: 7.5 ETCS cr

Degree Level: Undergraduate level

Books

Campbell, James B., Wynne, Randolph H. (2011). *Introduction to remote sensing*. New York: Guilford Press 5th ed.

International scientific journals, e.g.: European Journal of Remote Sensing; International Journal of Applied Earth Observation and Geoinformation; International Journal of Remote Sensing; IEEE Journal of Selected Topics in Applied Earth Observations and Remote Sensing; IEEE Transactions on Geoscience & Remote Sensing; ISPRS Journal of Photogrammetry and Remote Sensing; Journal of Applied Remote Sensing; Remote Sensing Applications: Society and Environment; Remote Sensing of Environment

Approved by the Faculty Board of Health, Science and Technology 03/15/2019
