

PUBLISHED PROGRAMME ANALYSIS

Publishing date: 2019-08-19

The programme analysis has been completed and published by the programme coordinator. The Karlstad University evaluation tool is owned by the Professional Development Unit and is managed by the systems group for educational administration, Student Centre.

Master Programme in Information Systems, 120 ECTS cr
Programme coordinator: John Sören Pettersson

Basic LADOK data

Programme code: SAINF
Specialisation:
Application code: 69184
Starting semester: HT -17
Pace of study: 100%
Form of study: Campus
City: Karlstad

Programme data

Number of students registered on the programme^[1]: 5
Number of current programme students^[2]: 5
Number of academic year questionnaires answered^[3]: 0

Programme evaluation

Student evaluation compilation

The distribution of answers to the individual questions are not displayed because the response rate is lower than 25% of the current number of programme students.

1. I think that the courses in the degree programme were relevant to the required learning outcomes.

- A. To a very great extent
- B. To a great extent
- C. To a certain extent
- D. To a very little extent/Not at all
- E. Don't know

2. The order of the courses was adapted to the required learning outcomes.

- A. To a very great extent
- B. To a great extent
- C. To a certain extent
- D. To a very little extent/Not at all
- E. Don't know

3. I was academically prepared for carrying out the concluding independent degree project.

- A. To a very great extent
- B. To a great extent
- C. To a certain extent
- D. To a very little extent/Not at all
- E. Don't know

4. I think that the degree programme has challenged my way of thinking, and that my studies have offered intellectual challenges.

- A. To a very great extent
- B. To a great extent
- C. To a certain extent
- D. To a very little extent/Not at all
- E. Don't know

5. By following this degree programme, I have developed the competences and skills I expect to need in future professional activities

- A. To a very great extent
- B. To a great extent
- C. To a certain extent
- D. To a very little extent/Not at all
- E. Don't know

6. I would recommend this degree programme to others.

- A. To a very great extent
- B. To a great extent
- C. To a certain extent
- D. To a very little extent/Not at all
- E. Don't know

Summary of student evaluations based on the questionnaire, free text comments and any other data.

One student was recruited after third semester but says to be interested in completing a Master thesis related to his work. A student from EU has been full time working and is starting his thesis work not until autumn 2019 but is very happy to do course work (past and future) in relation to his work at world leading IT firm. Two more students have been working 18/19 and expressed interest to continue but would like to do so in relation to IT companies. A fifth student dropped out when married in Kenya.

The programme coordinator's final analysis.

Obviously, work-orientation is quite important for several students and therefore we should continue to have project-based courses for the second year. After this cohort passed first semester, the programme structure has been changed with two more IT-oriented courses in the very first semester; this would probably have affected also the autumn'17 cohort's course completion positively.

Suggestions for improvements.

-

¹ Registered programme student current cohort, no approved leave, no non-completion and registered for a course at Kau current semester.

² Number of students who have not clicked "No" - "I am not a student on the programme stated above this academic year" in the evaluation.

³ Number of students who answered at least 1 question, or commented in free text field.
