### **Summary of student evaluations based on the questionnaire, free text comments and any other data.**

No student participated in the questionnaire.

### **The programme coordinator's final analysis.**

There are not enough student replies to the questionnaire to do a meaningful program analysis.

However, judging from the analyses of the individual courses which are part of the Master program, the great majority of students is very satisfied with the structure and the content of the courses.

### **Suggestions for improvements.**
