Summary of student evaluations based on the questionnaire, free text comments and any other data.

There was only one student who answered the questionnaire. This student checked option C ("to a certain extent") for all questions.

The programme coordinator's final analysis.

There are not enough student replies to the questionnaire to do a meaningful program analysis.

However, judging from the analyses of the individual courses which are part of the Master program, the great majority of students is very satisfied with the structure and the content of the courses.

Suggestions for improvements.

No changes.

¹ Registered programme student current cohort, no approved leave, no non-completion and registered for a course at Kau current semester.

² Number of students who have not clicked "No" - "I am not a student on the programme stated above this academic year" in the evaluation.

³ Number of students who answered at least 1 question, or commented in free text field.
