### **The programme coordinator's final analysis.**

We had some students opting for a 1-year exam last spring. Only five students were registered for the Master thesis course spring 2022; four being enrolled in the programme. For June, only two master theses are going to be defended but some further after the summer. In addition, two students had no chance to start the thesis writing this semester but have applied for autumn.

### **Suggestions for improvements.**

No particular changes are planned. All active programme students the second year are employed and there is no reason to rush the final course. We let it take the time needed for each student to complete the thesis.
