

Programme Syllabus

Master Programme in Computer Science

Programme Code:	TAMCS
Programme Title:	Master Programme in Computer Science (Masterprogram i datavetenskap)
Credits:	120
Programme Approval:	The programme syllabus was approved by the Faculty Board of Health, Science and Technology, 3 February 2022, effective from the autumn semester of 2022.
Language of Instruction:	English
Education Cycle:	Second cycle
Degree Type:	General
Degree Title:	Degree of Master of Science (120 credits) Main field of study: Computer Science Teknologie Masterexamen Huvudområde: Datavetenskap
Entry Requirements:	General entry requirements. Upper-secondary school English 6 or equivalent, Degree of Bachelor 180 credits with at least 90 credits in computer science, including the following courses: Programming Techniques 7.5 credits Software Development Methodology 7.5 credits Operating Systems 7.5 credits Computer Networking I 7.5 credits and Mathematical Statistics 7.5 credits (or courses equivalent to the courses mentioned above)

Introduction

Computer science is a rapidly developing field. In line with this, the programme at Karlstad University is designed to equip students with the ability to continuously acquire and apply new knowledge. The aim of the programme is also for students to acquire specialised competence in the field of computer science with focus on the profile areas at Karlstad University: computer networking, cyber security and software development.

Programme Outcomes

In accordance with the national learning outcomes of a Degree of Master, the following programme outcomes apply.

Knowledge and understanding

For a Degree of Master (120 credits) the student shall

- demonstrate knowledge and understanding in the main field of study, including both broad knowledge of the field and a considerable degree of specialised knowledge in computer networking, computer security and software development as well as in-depth insight into current research and development work in computer networking, cyber security and software development.

Competence and skills

For a Degree of Master (120 credits) the student shall

- demonstrate the ability to critically and systematically integrate knowledge and analyse, assess and deal with complex phenomena, issues and situations even with limited information,
- demonstrate the ability to identify and formulate issues critically, autonomously and creatively as well as to plan and, using appropriate methods, undertake advanced tasks within predetermined time frames and so contribute to the formation of knowledge as well as the ability to evaluate this work,
- demonstrate the ability in speech and writing both nationally and internationally to clearly report and discuss his or her conclusions and the knowledge and arguments on which they are based in dialogue with different audiences, and
- demonstrate the skills required for participation in research and development work or employment in some other qualified capacity.

Judgement and approach

For a Degree of Master (120 credits) the student shall

- demonstrate the ability to make assessments in computer networking, computer security and software development informed by relevant disciplinary, social and ethical issues and also to demonstrate awareness of ethical aspects of research and development work,
- demonstrate insight into the possibilities and limitations of research, its role in society and the responsibility of the individual for how it is used, and
- demonstrate the ability to identify the personal need for further knowledge and take responsibility for his or her ongoing learning.

Programme Structure

The programme comprises four semesters. The first two semesters consist of courses in the

profile areas of computer science: computer networking, cyber security and software design. These courses are usually led by a researcher from the relevant research group. The third semester consists of optional courses with the opportunity to study abroad. It is also possible to specialise further in the profile areas of computer science, or select courses from other subject areas. The degree project is preferably completed in collaboration with a company, government agency or the research group in computer science.

Internationalisation

Karlstad University wants to promote collaboration and exchange with other universities. Karlstad University has partnerships with many other universities in Sweden and abroad, and has an organisation in place to support students who want to make use of this opportunity. Students are therefore encouraged to complete part of the programme at a university abroad.

Programme Curriculum

The programme comprises 120 credits including a degree project, with at least 90 credits in the main field of study at Master's level.

Year 1

The first year of the programme consists of obligatory courses in both the profile areas of computer science as well as basic courses in advanced computer science. The first semester includes the following courses:

Obligatory courses (30 credits):

Advanced Communication Networks, 5 credits
Internet Architectures and Protocols, 5 credits
System Modeling and Simulation, 5 credits
Methods in Computer Science, 7.5 credits
Internet Security and Privacy, 7.5 credits

The second semester includes the following courses:

Distributed Systems and Cloud Computing, 7.5 credits
Ethical Hacking, 7.5 credits
Software Architectures of Distributed Applications, 5 credits
Wireless Systems, 5 credits
Distributed Applications: Development Projects, 5 credits

Year 2

The second year of the programme includes optional courses of 30 credits and a degree project of 30 credits.

Credit Transfer

Students have the right to transfer credits from previously completed university courses in Sweden or abroad, subject to approval according to the current regulations. Students have the right to transfer credits from previously completed university courses in Sweden or abroad, subject to approval according to the current regulations.

Additional Information

The local regulations for first and second cycle education at Karlstad University stipulate the obligations and rights of students and staff.

This programme syllabus will replace the previous version approved 14 June 2018, reg. no: HNT 2018/349.
